

Напишите что выведет программа на экран. Проверьте себя запустив программы.

1)

```
a = 4
```

```
b = 3
```

```
a = a + b
```

```
b = b + 1
```

```
c = a + b
```

```
print(a , b + 2, c - 3, sep="4", end="1")
```

```
d = a % b + b % a
```

```
m = 4
```

```
n = 2
```

```
e = m / n + 2
```

```
print(m // n, e - 2, sep="1" )
```

2)

```
a = 4
```

```
b = 11
```

```
d = str(a)
```

```
print(a * d)
```

```
b = str(b)
```

```
print(d + b)
```

```
e = int(d * 2)
```

```
print(e + a)
```
